

What a Habitat for Humanity home has meant to us:
The Ackerland Family

Having a home built (through HFHS) has been a wonderful experience for us. It has enabled us to have a safe, permanent environment to raise our 5 children. We have a decent backyard that the kids love playing in, and we are able to enjoy it as well (bbq's and fires). Our home is full of bright colours whose vibrancies reflect our attitudes towards our home, always full of activity and love, but most of all a sense of security.

2006 started off to a great start with us being chosen to partner with HFS. Building was an enjoyable experience that our extended families and friends were able to participate in, then Sept of '06, we moved into OUR home. Our home was blessed with the birth of our youngest daughter literally born in our home.

Although owning a home means that there will always be some work to do (upkeep, decorating, minor repairs) it is a job that we look forward to doing together as we grow. Habitat for Humanity has helped us to achieve a large dream that we could not have achieved by ourselves. For that, we will always be thankful!

Thank you HFHS and all their supporters,

The Ackerland Family
